General Description

TIA Formazione is an APS registered to RUNTS- New Register of third sector from October 2022, active from 2011.. It is member of several networks and active in eu wiritung, trainings and implementation from 2012. Founded by Ines Caloisi and Adriana Barbolla, its core values are represented by respect for human rights in accordance with the Universal Declaration of Human Rights, the European Convention on Human Rights and the Nice Charter. Our actions are oriented towards creating a more European society, an actor that plays a political role in an international context, therefore promoting activities oriented towards European integration is our main objective. In order to achieve our values, we have chosen the main activities that are implemented through training projects that promote an innovative approach by focusing on EDUCATION, the primary sector around which our wide-ranging projects move. TIA Formazione's "core activities" are designed for two main targets: young people and adults. At a strategic level, they are defined for a period of three years, aiming at an implementation that is reviewed at the end of each significant project action, which is carried out in one of these main sectors.

Please briefly present the partner organisation.

For each of the two targets, TIA Formazione is committed to participating in European projects, according to the calls promoted by the Erasmus plus programme (both by the National Agencies and by EACEA) and by the Europe of Citizens programme. It also promotes structured training seminars to provide concrete skills to spend on the labour market. The declination of Education is also expressed through specific projects on MIGRATION, with project actions that aim to improve the awareness and integration of non-European citizens in Europe.

As far as the EDUCATION of ADULTS is concerned, our aim is to improve the competences of the staff by collaborating with European partners in order to improve the internal competences and consequently also the international competitiveness of TIA Formazione. TIA Formazione offers and promotes adult education courses to public and private bodies in the areas of LEADERSHIP DEVELOPMENT.

In the youth field, TIA Formazione promotes and supports innovative activities in the field of education, with the aim of promoting projects aimed at enhancing talents and developing entrepreneurship with work-based learning experiences by virtue of the participation and writing of ERASMUS + VET projects both with mobility projects and hosting students for internship and internship experiences in the university field.

TIA is also active in projects in favour of NEETS, by definition neither in the field of employment nor in the field of education or training and carries out numerous learning activities based on work for young people also internally in its organisation in agreement with public schools.

The International strategy aims at the concrete implementation of at least three European projects per year in the Youth and Adult sectors, financed under ERASMUS +. This strategy is the result of an analysis shared with the Board and members of a relative action plan drawn up in August and September of each year, a strategy approved by the Board and presented each year to the members' meeting.

From 2021 TIA Formazione is implementing activities and projects addressed to OVER 50 years old to the aim of proposing solutions to face these turbulent times.

To implement this strategy, TIA Formazione relies on a network of professionals in the field of training and design, annual participation in at least three training courses, attended annually by the manager and members of the board, in order to improve specific skills, not only in specific areas of activity, but also aimed at investing in personal growth. In this sense, the leadership and authenticity sector related to education is an example.

It is established and planned every year the participation of the staff involved in the infoday of the specific calls for which we intend to present projects, both in Italy and in Bruxelles.

At the end of each year, which corresponds to the arrival of the results of the projects, usually in the months of July-August, the strategy is defined, whose indicators are represented by the concrete results of the project actions presented, by the number of participants in training seminars promoted, by the active networks, by the. New collaborations and the number of new networks to which you decide to join.

The themes of the projects are discussed with solid partnership networks, built over the years, always aiming to open collaborations with new European and international partners.

Member of DIGITAL SKILLS and JOB COALITION since 2015 (<https://ec.europa.eu/digital-single-market/en/digital-skills-jobs-coalition>).

TIA Formazione is also active in mediterranean cooperation projects such as ENI CBC MED, where just this year has been partner of an eu project, just presented, where TIA Formazione has had also the role of creating the partnership and leading and writing the project applied by ROMA TRE University.

Member also of the [PACT OF SKILLS](#) investor in training activities.
